

Between-group contrasts within the Security condition

Age

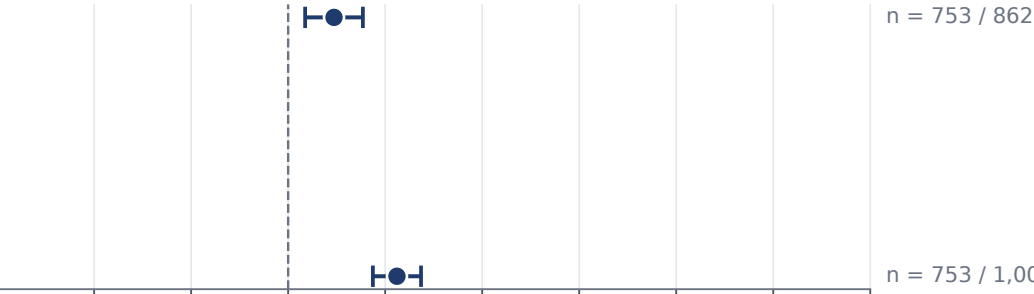

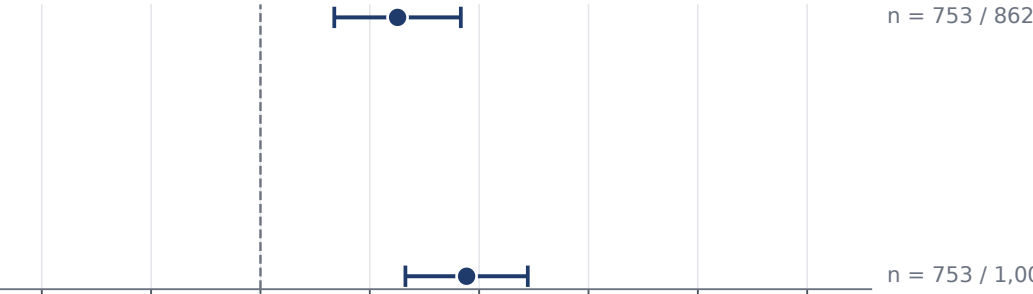

Movement legitimacy

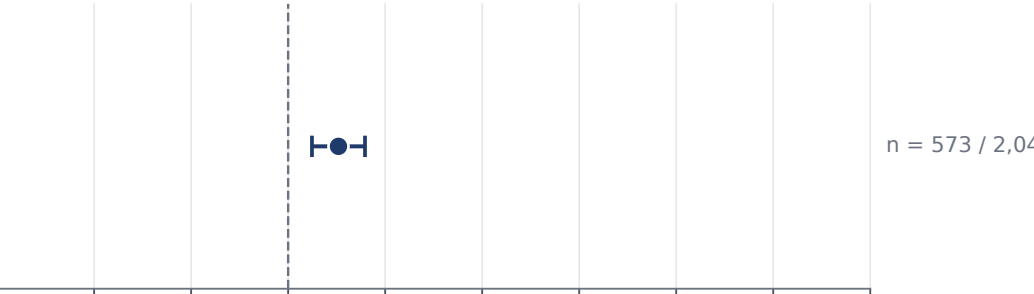

Behavioral intent

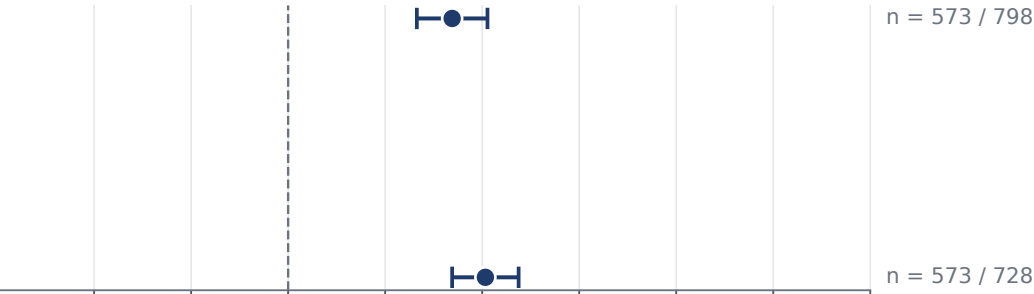

Education

Ethnic origin

Political orientation

Security-condition contrast (Likert scale points, Tukey-adjusted)

Security-condition contrast (percentage points, binomial marginal prob.)

Point = target-minus-reference mean/proportion difference within the Security condition; whiskers = 95% CI (Tukey-adjusted for legitimacy; Wald for behavioral intent). Positive → target group has higher legitimacy / attendance than reference. 'Not reported' categories excluded.
